

The Lumishore range is not only available for boating applications. Using the same technology as its boating models, the Lumishore Shorelite brings amazing new capabilities to fixed shoreside applications and water features. providing beautiful tranquil waterside settings as well as additional safety and security.

The Lumishore Shorelite is the most powerful, efficient and cost effective underwater lighting system on the market today. Its compact but powerful performance allows discrete installation whilst providing class-beating lighting performance.

The Shorelite is suitable for Docks, Marinas, Pontoons, Water Features, Ponds and other underwater applications.

Features and Benefits

- Brighter & More Powerful than competitor offerings - less units required.
- Powerful, Deep, Wide and Evenly Distributed light beams.
- Flexibility of colour options.
- Compact enabling discrete mounting.
- Sealed unit - no servicable parts inside.
- Colour change available - please contact Lumishore.
- Lumishore Extended Pole attachment option for ease of cleaning.
